

# Empowered San Francisco Technology Survey

Bridging the Digital Divide  
for San Francisco Residents  
with Disabilities & Older Adults

The City of San Francisco is conducting a **city-wide survey to understand the technology barriers and needs of SF residents with disabilities and older adults (60+)** during the COVID-19 pandemic.

This project is led by Thriving in Place, and will be shared with the Department of Disability and Aging Services (DAS) and the Mayor's Office on Disability (MOD) as part of COVID-19 Response in the City of San Francisco.

Responses to this survey will inform the City's approach to expanding access to the Internet, devices and digital support needed for residents to get information about services, have online health visits, stay connected with family and friends, and participate in social activities during the COVID-19 pandemic.

If you are a person with a disability, an older adult (60+), a transition-age youth (18-24), a veteran, a person experiencing homelessness, or a parent of a child with a disability, we want to learn from you!
